

CULTIVATE PRODUCTIVITY

In today's market, it's not enough to be good at what you do. Knowing the product at its fullest allows your trained staff to improve product development and cut cycle time to help you better meet your customers' needs.

CATIA Assessment Service Offering

AscendBridge Solutions is pleased to present our CATIA Assessment Service Offering.

Our experience indicates that there is a continuous requirement to sharpen the software skills of designers and engineers on existing and advanced functionality of the CATIA software. There are best practices and ways of utilizing specific commands to unleash the true potential of CATIA to reduce design time and make the design process more efficient.

This service includes a detailed assessment of all existing CATIA design methodologies and practices currently in use by your organization.

Deliverables and Benefits

Upon completion of the CATIA assessment, AscendBridge will provide a detailed report outlining the findings and recommended areas for improvement. An action plan will be created to implement adjustments to your current processes to utilize CATIA at the highest productivity level.

This analysis can be used as an effective tool by your management team to plan and budget future training requirements or extended support requirements. You will achieve better results, save time and increase efficiencies.

To schedule an assessment or for more information please call 905-944-0047 or email catia@ascendbridge.com
